A Luxfer Group Company

Elektron Global Logistics Solutions

Working within the demanding automotive industry, our customers rely upon high quality magnesium alloy ingot delivered on time, in full, 100% of the time.

To meet our customers' delivery schedules, Magnesium Elektron requires a highly effective logistical service, both to collect the customers' feedstock scrap and to return the recycled high purity alloy ingot.

Movements of material are managed within a closed loop system using Magnesium Elektron's global logistical infrastructure.

Our logistical capabilities include:

- Expertise in the movement of green and amber listed materials.
- Container placement and following day collection service.
- Range of container sizes (1m³ to 65m³).
- Segregated, undercover storage.
- Crushing facilities to maximise payloads for bulk haulage.
- Scrap sorting facilities
- Monitoring systems to minimise work in progress stock.
- Rapid ingot delivery services.

Certificate No. FM12677
